### Sample identification

| Substance   | Method of taking a sample                 | Form |
|-------------|---|------|
| Retatrutide | Retatrutide Sample provided by customer V |      |

#### **Results**

| Substance   | Sample name                | Content | Purity |
|-------------|----------------------------|---------|--------|
| Retatrutide | GENETIC RESEARCH RETA 10MG | 10,13mg | 99%    |

#### **Research comment**

The test sample was applied in the amount of 3  $\mu$ l to the BioBasic 8 Thermo Scientific column. During the course of the analysis with the method a linear gradient in the solutions of H20 and Acetonitrile with the addition of 0.1% trifuluoroacetic acid, a peak of the sought substance appeared. Its concentration, when compared to the reference chromatogram, is 10,13mg. Height the measurement error is + - 0,05 mg. The actual state of the sample sent before the test is presented on the photo below
